SECTION 1 – PRODUCT IDENTIFICATION

Product Name: “GO CLEAN GO GREEN” BATHROOM CLEANER - GRAPEFRUIT
Use: Acidic cleaning solution.

Distributor: Rubbedin Pty Ltd
Emergency Phone No: 0405358685
Regular Phone No: (07) 3245 3255
Fax: (07) 3245 2554
Email: rubbedin@rubbedin.com.au
Address: Unit 1/43 Neumann Road Capalaba QLD 4157

SECTION 2 – HAZARDS IDENTIFICATION

- This product is NOT classified as HAZARDOUS according to criteria of the National Occupational Health and Safety Commission Australia.
- This product is NOT classified as Dangerous Goods according to the Australian Dangerous Goods (ADG) Code.
- This product is NOT classified as a Scheduled Poison according to the SUSDP.

Approved Worksafe
Criteria Classification None allocated
UN Number none allocated
Shipping Name none allocated
Hazchem Code none allocated
SUSDP Classification none allocated

EMERGENCY OVERVIEW
Colour pink
Odour fragrant
Physical Description Liquid
Viscosity Non-viscous liquid
Major Health Hazards None known

SECTION 3 – INGREDIENTS

Ingredients determined not to be hazardous are present in concentrations that do not exceed the relevant cut-off concentrations as found from NOHSC publication “List of Designated Hazardous Substances” or have been found NOT to meet the criteria of a hazardous substance as defined in the NOHSC publication “Approved Criteria for Classifying Hazardous Substances”.

</table>

The TWA exposure value is the Time Weighted Average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5 day working week. The STEL (Short Term Exposure Limit) is an exposure value that should not be exceeded for more than 15 minutes and should not be repeated for more than 4 times per day. There should be at least 60 minutes between successive exposures at the STEL. The term “peak” is used when the TWA limit, because of the rapid action of the substance, should never be exceeded, even briefly.

SECTION 4 - EMERGENCY AND FIRST AID PROCEDURES
Scheduled Poisons
Poisons Information Centre in each Australian State capital city or in Christchurch, New Zealand can provide additional assistance for scheduled poisons. (Phone Australia 131126 or New Zealand 03 474 7000).

First Aid Facilities
Normal washroom facilities.

Skin contact
Wash skin with plenty of water. Remove contaminated clothing and wash before re-use. Seek medical advice (e.g. doctor) if irritation, burning or redness develops.

Eye contact
Immediately irrigate with water for at least 20 minutes. Eyelids to be held open. Seek medical advice (e.g. ophthalmologist) if any irritation persists.

Ingestion
Do NOT induce vomiting. Rinse mouth thoroughly with water immediately. Give water to drink. If vomiting occurs, give further water to achieve effective dilution. Seek medical advice (e.g. doctor).

Inhalation
Remove victim to fresh air away from exposure - avoid becoming a casualty. Seek medical advice (e.g. doctor) if symptoms persist.

Advice to Doctor
Treat symptomatically. All treatments should be based on observed signs and symptoms of distress of the patient.

Aggravated Medical Conditions
None known.

SECTION 5 – FIRE FIGHTING MEASURES

Fire and Explosion Hazards
Water based. Not combustible. However if involved in a fire will emit toxic fumes.

Extinguishing Media
Use an extinguishing media suitable for surrounding fires.

Fire Fighting
Keep containers exposed to extreme heat cool with water spray. Fire fighters to wear self-contained breathing apparatus if risk of exposure to products of combustion or decomposition. Evacuate area - move upwind of fire.

Flash Point
not flammable.

SECTION 6 – ACCIDENTAL RELEASE MEASURES

Emergency Procedures
No HAZCHEM code.

Occupational Release
In the event of a major spill, prevent spillage from entering drains or water courses. For large spills, or tank rupture, consider initial evacuation distance of 200 metres in all directions. Stop leak if safe to do so. If available, use water spray to disperse vapour. Wear appropriate protective equipment as in section 8 below to prevent skin and eye contamination. Spilt material may result in a slip hazard and should be absorbed into dry, inert material (e.g. sand, earth or vermiculite), which then can be put into appropriately labelled drums for disposal by an approved agent according to local conditions. Residual deposits will remain slippery. Wash area down with excess water. If contamination of sewers or waterways has occurred advise the local emergency services. In the event of a large spillage notify the local environment protection authority or emergency services.

SECTION 7 – HANDLING AND STORAGE

Handling
Avoid contact with incompatible materials. When handling, DO NOT eat, drink or smoke. Keep containers closed at all times. Avoid physical damage to containers. Always wash hands with water after handling.

Storage
Store in a cool, dry, place with good ventilation. Avoid storing in aluminium and light alloy containers. Store away from incompatible materials (Section 10). Keep containers closed at all times – check regularly for leaks.

SECTION 8 – EXPOSURE CONTROLS AND PERSONAL PROTECTION
Exposure Limits
National Occupational Exposure Limits, as published by National Occupational Health & Safety Commission:
Time-weighted Average (TWA): None established for specific product.
See SECTION 3 for Exposure Limits of individual ingredients.
Short Term Exposure Limit (STEL): None established for specific product.
See SECTION 3 for Exposure Limits of individual ingredients.

Biological Limit Value
None established for product.

Engineering Controls
No special requirements.

Personal Protective Equipment
This product is not classified as hazardous according to the criteria of Worksafe Australia. Use good occupational work practice. The use of protective clothing and equipment depends upon the degree and nature of exposure. Final choice of appropriate protection will vary according to individual circumstances i.e. methods of handling or engineering controls and according to risk assessments undertaken. The following protective equipment should be available:

Eye Protection
Eye protection is recommended. The use of safety glasses with side shield protection, goggles or face shield is recommended to handle in quantity, cleaning up spills, decanting, etc. Contact lenses pose a special hazard; soft lenses may absorb irritants and all lenses concentrate them.

Skin Protection
Gloves are recommended for typical cleaning operations. Overalls, work boots and elbow length gloves are recommended for handling the concentrated product (as per AS/NZS 2161, or as recommended by supplier) to handle in quantity, cleaning up spills, decanting, etc.

Protective Material Types
Material suitable for detergent contact – Butyl rubber, Natural Latex, Neoprene, PVC, and Nitrile.

Respirator
Not required for normal cleaning operations.

SECTION 10 – STABILITY AND REACTIVITY

Chemical Stability
Stable at normal temperatures and pressure.

Conditions to Avoid
Oxidising agents, extremes in temperature.

Incompatible Materials
Oxidising agents.

Hazardous Decomposition
Product can decompose on combustion to form Carbon Monoxide, Carbon Dioxide, and other possibly toxic gases and vapours.

Hazardous Reactions
None known.

SECTION 11 – TOXICOLOGICAL INFORMATION
PRODUCT MIXTURE INFORMATION
Local Effects
Mild irritant: eye, skin, inhalation and ingestion.
Target Organs
Eyes, mucous membranes, skin.

POTENTIAL HEALTH EFFECTS
No adverse health effects expected if the product is handled in accordance with this Safety Data Sheet and the product label. Symptoms or effects that may arise if the product is mishandled and overexposure occurs are:

Ingestion
short term exposure
Harmful if swallowed. Ingestion of this product may cause nausea, vomiting, abdominal pain and irritation to the mouth, throat and stomach.
long term exposure
No information available.

Skin contact
short term exposure
Concentrated product may cause skin irritation. Prolonged contact with concentrated solutions may be irritating. Properly diluted wash solutions not expected to be irritating.
long term exposure
Prolonged and repeated skin contact with undiluted solutions may induce eczematoid dermatitis.

Eye contact
short term exposure
Eye contact may cause stinging, blurring, tearing, pain.
long term exposure
No information available.

Inhalation
short term exposure
Exposure to generated mists of this product may cause slight nose and throat irritation.
long term exposure
No information available.

Carcinogen Status
NOHSC
No significant ingredient is classified as carcinogenic by NOHSC.
NTP
No significant ingredient is classified as carcinogenic by NTP.
IARC
No significant ingredient is classified as carcinogenic by IARC.

Medical conditions aggravated by exposure
No information available.

CLASSIFICATION OF INDIVIDUAL INGREDIENTS
NOTE: This information relates to each individual ingredient, when evaluated as pure undiluted chemical. See SECTION 3 for actual proportions of ingredients present in this product.

Ingredients
Citric acid
R36/38
Glycolic acid
R34, 37, 20/22, 41
Ethanol
R11

ETHANOL 100%
Irritation Data
Moderately irritating to skin – may cause redness. Moderately irritating to eyes – may injure tissue. Moderately irritating to respiratory system and mucous membranes.
Toxicity Data
Excessive chronic absorption may result in liver damage.
LD50 oral (rat) : 2080 mg/kg
Local Effects
Absorbed into the body by inhalation and ingestion. Irritant of sensitive tissues, eg eyes and mucous membranes. Central nervous system depression.
Target Organs
Eyes, mucous membranes, liver, central nervous system.
Acute Toxicity Level
Mild toxicity. narcotic properties: ingestion.
Mutagenic Data
No known effects.
Reproductive Effects
No known effects.

Citric acid 100%
### Irritation Data
Irritation based on 100% Citric acid (dry) Moderate irritant, 500 mg/24 hr, to skin (rabbit) Severe irritant, 750 micrograms/24 hrs, to eyes (rabbit)

### Toxicty Data
Animal toxicology based on 100% Citric acid (dry) Oral LD50 11.7 g/kg (rat)

### Local Effects
Corrosive and harmful: inhalation, skin, eye, ingestion

### Chronic Toxicity
No available information.

### Target Organs
Skin, mucous membranes, eyes.

### Acute Toxicity
Low toxicity

### Reproductive Effects
No available information.

### Mutagenic Data
No available information.

### Carcinogenic Data
Citric acid is not listed by NTP, IARC, OSHA, EPA or any other authority as a carcinogen.

---

### Glycolic acid 100%

#### Irritation Data
Skin Irritation: Severe skin irritation. Acute dermal corrosion (rabbit) Eye Irritation: Causes burns (rabbit).

#### Toxicty Data
Oral LD50 Rat: 1938mg/Kg Oral LD50 Rat: 1938mg/Kg (Glycolic acid) Inhale LC50 4hr: >5.2mg/L (Female Rat) Inhale LC50 4hr: >5.2mg/L (Female Rat) (Glycolic acid).

#### Local Effects
Corrosive and harmful: inhalation, skin, eye, ingestion

#### Chronic Toxicity
No available information.

#### Target Organs
Skin, mucous membranes, eyes.

#### Acute Toxicity
Low toxicity

#### Reproductive Effects
No available information.

#### Mutagenic Data
No available information.

#### Carcinogenic Data
Glycolic acid is not listed by NTP, IARC, OSHA, EPA or any other authority as a carcinogen.

---

### SECTION 12 – ECOLOGICAL INFORMATION

#### Fish toxicity
None available for specific product.

#### Algae toxicity
None available for specific product.

#### Invertebrates toxicity
None available for specific product.

#### Toxicity to Bacteria
None available for specific product.

#### OECD Biological degradation
Individual components have been specifically included in this product because they are known to be readily biodegradable and of low toxicity to fish and other aquatic organisms.

#### General
Product miscible in all proportions with water. As with any chemical product, do not discharge BULK quantities into drains, waterways, sewer or environment. Inform local authorities if this occurs.

---

### SECTION 13 – DISPOSAL CONSIDERATIONS

#### Disposal
The small quantities contained in wash solutions (when used as directed) can generally be handled by conventional sewage systems, septs, and grey water systems. To dispose of quantities of undiluted product, refer to State Land Waste Management Authority. Transfer product residues to a labelled, sealed container for disposal or recovery. Waste disposal must be by an accredited contractor. As with any chemical, do not put down the drain in quantity. For larger scale use, eg. Commercial laundry operations, a recycled water system is often recommended, or Trade Waste License obtained for disposal to sewer.

This MSDS summarizes at the date of issue our best knowledge of the health and safety hazard information of this product, and in particular how to safely handle and use this product in the workplace. Since the supplier cannot anticipate or control the conditions under which the product may be used, each user must, prior to usage, review this MSDS in the context of how the user intends to handle and use the product in the workplace. If clarification or further information is needed to ensure that an appropriate assessment can be made, the user should contact this supplier.

The MSDS is valid for five years from date of issue but may be withdrawn and revised at any time prior to that date. All information contained in the Data Sheet is as accurate as possible at the time of issue. It is meant to describe the safety requirements of our products and should not be construed as guaranteeing specific properties. As per the Worksafe Guidance Note NOHSC 3017, each used should review the information in the specific context of the intended application. No expressed or implied warranties nor any responsibility for damages resulting from sue of the information are given other than those implied mandatory by Commonwealth, State or Territory Legislation. If this product is to be re-packaged by others, it will be necessary for a new MSDS to be generated by the re-packer.
