8. EXPOSURE CONTROLS/PERSONAL PROTECTION

National Exposure Standards The National Occupational Health and Safety Commission (Worksafe Australia) has set no exposure standards for this material. This does not imply that this material is safe or non-hazardous. There may be insufficient information available to allow the National Commission to assign an exposure standard, even on a tentative basis. Where exposure standards are available for the ingredients of this material, they are listed below.
Exposure Standards are guides to be used in the control of occupational health hazards. They are not fine dividing lines between safe and dangerous concentrations of chemicals nor are they measures of relative toxicity. All atmospheric contamination should be kept to as low a level as is practicable.

Engineering Controls Use adequate ventilation to maintain concentrations below the exposure standards.

Personal Protective Equipment Always wash hands before smoking, eating, drinking or using the toilet.
