

S-7 SMARTSAN Hand Sanitiser

Food Safe alcohol based hand rub

An ethanol based spray that kills 99.99% of germs in seconds. The atomised liquid provides the best coverage and saturation available in hand sanitiser. S-7 SMARTSAN Hand Sanitiser is food safe manufactured in a certified quality assured facility, and ideal in all food handling areas and office environments.

Formula – A highly effective 70% alcohol based hand sanitiser designed for use in food services. Suitable for use with a HACCP based food safety program.

Moisturising – The light formula evaporates quickly while plant based emollients are absorbed into the skin, leaving hands feeling soft, replenished, and clean.

Delivery – The atomised liquid formulation is proven to be more effective in saturating the skin and crevices for better coverage. Because there is no gelling agent present, hands do not build up a sticky residue.

| Feature | Description |
|------------------|--|
| Biodegradability | This product will evaporate, therefore not able to be tested for biodegradability |
| Alcohol Content | 70% v/v alcohol |
| Alcohol Type | A solution not a Gel. Dispensed as an atomised mist. |
